SUMMARY

Full Stack Engineer with 4+ years of experience, mostly in enterprise — currently building an AI investment platform at Mubadala, previously shipped in-car infotainment systems for Volkswagen. I take responsibility naturally, pick up new technologies quickly, and prefer being the person who talks to the client rather than avoiding it.

EXPERIENCE

Senior Software Engineer — Mubadala

2024 – Present

- Building MAIA, Mubadala's internal AI platform for investment intelligence and corporate workflows
- First role as a Senior Developer, in a large team with high standards for code quality and delivery
- Supporting teammates with technical challenges, coordinating across teams, and working on-site with clients

Tech: TypeScript · React · Jotai · .NET · Tailwind · Fluent UI · Azure DevOps

Software Engineer — IAV GmbH / Volkswagen

2023 – 2024

Project: Wellness Infotainment System

- Built the Wellness Infotainment System for VW ID cars — integrating climate, panoramic roof, ambient lighting, seat massage, and smart lights into one application
- Delivered the project on schedule with one colleague, including on-site development at VW factories, coding directly in the vehicles
- Designed coordination patterns to manage multiple physical vehicle systems through a single web interface

Tech: Angular · RxJS · NgRx · Node.js · gRPC · VW Internal Libraries · Git · Bitbucket

Software Engineer & Project Lead — "Saint Sofia" Private School (Contract)

2023 – 2023

Project: School Management System

- Took over as both tech lead and client-facing representative after the original team had left
- Led full-stack development of a school management system for exams, tests, and assignments
- Managed client communication, distributed tasks across the team, and delivered a new version with improved design and AI features

Tech: TypeScript · React · Redux · Redux Saga · Node.js · Express · MongoDB · Mongoose · MUI · Docker

Software Engineer Consultant — Celonis (Contract)

2023 – 2023

Project: Bank Application Modernization

- Brought in solo to refactor a critical part of a fintech application from legacy imperative code to modern ES6
- After resolving the immediate issues, mentored the team on cleaner patterns and how to continue the refactoring themselves

- All changes had to maintain full backward compatibility for existing users

Tech: TypeScript · React · Redux · Redux Saga · MySQL · Git · Bitbucket

Software Engineer — IAV GmbH / Volkswagen

2022 – 2023

Project: WeCharge EV System

- Built WeCharge — an infotainment system for VW, SEAT, and Skoda EVs showing nearby charging stations with real-time availability and pricing
- Started as a junior and was working on tasks independently within the first week on a large team
- Integrated Angular with VW's internal framework libraries and connected to backend services over gRPC

Tech: Angular · RxJS · NgRx · Node.js · gRPC · Leaflet · VW Internal Libraries · Git · Bitbucket

Lead Developer (Graduate Project) — Telerik Academy

2022 – 2022

Project: Impulse Communication Platform

- Built Impulse — a real-time chat application with messaging, file sharing, and notifications, developed from scratch
- Led a team of three, defined the application architecture and development plan
- Won the award for best graduate project and graduated as a top performer, receiving multiple job offers

Tech: React · TypeScript · Firebase · MUI · Git · GitHub

SIDE PROJECTS

Project Stream — Founder & Software Architect [\[In Development\]](#)

SaaS platform for streaming vertical series. Mobile-first, built on managed services — Supabase edge functions for backend logic, Mux for video delivery, Cloudflare for infrastructure, and RevenueCat for monetization.

Tech: Expo · React Native · Mux · Supabase · Cloudflare · RevenueCat

TollTracker — Marketing & Product Consultant [\[Released\]](#)

Mobile app available on the App Store and Google Play. In this project I'm not writing code — I consult on UX, create content for articles, plan marketing campaigns, and work on user acquisition.

Tech: Figma · Outseta · RevenueCat · Stripe · Prismic

WHAT I BRING

Responsible & Proactive: I show up when something needs to be done, even if it's not my responsibility. Teams and managers have consistently trusted me for being proactive, helpful, and always answering the call to action.

Client-Facing Confidence: I represent the team and the project directly to clients without hesitation. I handle expectations, gather feedback, and make sure the communication between business and engineering is clear.

Quick to Adapt: If a technology is not in my current stack, it doesn't slow me down. I have a strong foundation in programming concepts and abstractions, which lets me pick up new tools and frameworks fast.

Team Lead & Planner: Experience leading teams, planning sprints, distributing work, and keeping delivery on track — while staying hands-on with the code.

SKILLS

Languages: TypeScript, JavaScript, Python

Frontend: React, Expo, Angular, Redux, Redux Saga, RxJS, NgRx, Jotai, HTML5, CSS3, SCSS, Tailwind, MUI, Fluent UI, Bootstrap

Backend & APIs: Node.js, Express.js, RESTful APIs, gRPC, MongoDB

Databases & Data: MongoDB, MySQL, Firebase, Supabase, Snowflake

DevOps & Tools: Git, Docker, Azure DevOps, Cloudflare, GitLab CI/CD, Bitbucket, GitHub Actions

Architecture & Patterns: Clean Architecture, Design Patterns, OOP, Functional Programming, Data Structures & Algorithms

Testing: Jest, Unit Testing, Integration Testing

AI-Assisted Development: ChatGPT, Claude, Claude Code, Gemini, Cursor, GitHub Copilot, Prompt Engineering

EDUCATION & CERTIFICATIONS

Computer Software Engineering — Telerik Academy

Intensive software development program. Graduated as top performer with best graduate project award.

CCNA Introduction to Networking — Cisco Networking Academy

Professional certification covering network fundamentals, protocols, and infrastructure

Software Engineer Professional Certificate — Bulgarian Ministry of Education

Official state-recognized professional certification in software engineering

Languages: Bulgarian (Native), English (Fluent), German (Basic)
